### **DETAILED ACTION**

**This Office Action is in response to Amendment B and the terminal disclaimer filed 12/16/02 in Paper No.s 11 and 12.**

#### ***Terminal Disclaimer***

The terminal disclaimer filed on December 26, 2002 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent 6,197,634 has been reviewed and is accepted. The terminal disclaimer has been recorded.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Sandhu ('199).

In reference to claim 20, Sandhu teaches a method comprising:

Forming a metal electrode with a textured surface (Fig.11 (68));

Covering the surface with a dielectric (Fig.11 (69));

Covering the dielectric with a second electrode (Fig.11 (70)).

In reference to claim 22 Sandhu teaches further including seeding (inhomogeneities) and annealing (anodization includes annealing) (Col.5, lines: 45-55).

In reference to claim 23, Sandhu teaches wherein the metal comprises hemispherical grain Si morphology (Col.2-3, lines: 65-6).

In reference to claim 24, Sandhu teaches wherein the metal electrode comprises forming a rugged Si layer and converting it to metal (Col.6, lines: 35-40).

#### ***Allowable Subject Matter***

Applicant's claims 6-12 can no longer be rejected under the doctrine of double patenting as a result of Applicant's terminal disclaimer (See Paper No.12, dated 1/12/03). Further, Applicant has argued persuasively that prior art fails to teach applicant's recited step of "replacing silicon in the silicon electrode structure with metal" as disclosed by the Applicant (See Paper No.11, dated 1/16/03 on page 2, paragraph 3). Consequently, Applicant has overcome the Examiner's rejections and claims 6-12 are allowable.

#### ***Response to Arguments***

Applicant's arguments with respect to claims 20-24 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

Art Unit: 2813

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
